

# Farmland and Timberland Investing in Uruguay

#### Advantages of Investing in Farmland

- Increasing global demand for food
- Consistent long-term appreciation
- Annual cash return
- Non-volatile asset
- Store of value

#### Investor-Friendly Country

- Foreign and local investors treated equally
- No limitations to ownership by foreign buyers
- No currency exchange controls or forced conversion
- Foreign currency can be used:Dollars,Euros, etc.
- No restrictions or taxes when transferring money into, or out of the country (repatriation of capital)

### Stability and Safety

- Latin America's safest country
- Tops rankings in political and economic stability
- Tops rankings in transparency and lack of corruption
- No social turmoil: existence of middle class and Latin America's lowest income gap
- Solid legal system with strong reputation for respect of contracts and private property

### Advantage # 1: Uruguay's Suitability

- Non-degraded soil
- Even rainfall year-round
- World's largest aquifer beneath region
- Temperate climate
- Two crops per year (over long run: 1.7)
- Competitive producer
- No government intervention in the market
- Developed land rental market

#### **Uruguay: A Global Player**

- 6<sup>th</sup> exporter of soybeans
- 5<sup>th</sup> exporter of dairy products
- 4<sup>th</sup> exporter of rice

• 5% of global beef exports ... Plus Uruguay is the only country in the world with 100% traceability of its herd

#### A country of 3 million feeding 40 million people

#### Plus: One of the World's Best Places for Forestry

- Fastest growth rate of eucalyptus, due to soil, climate and water availability: 8-10 year cycles
- World's highest FSC certification: 85% of forests
- In 2006 UPM (Finland) and in 2010 Stora Enso

(Sweden) built the world's largest and newest pulp mills....and in 2019 UPM launched a new one:

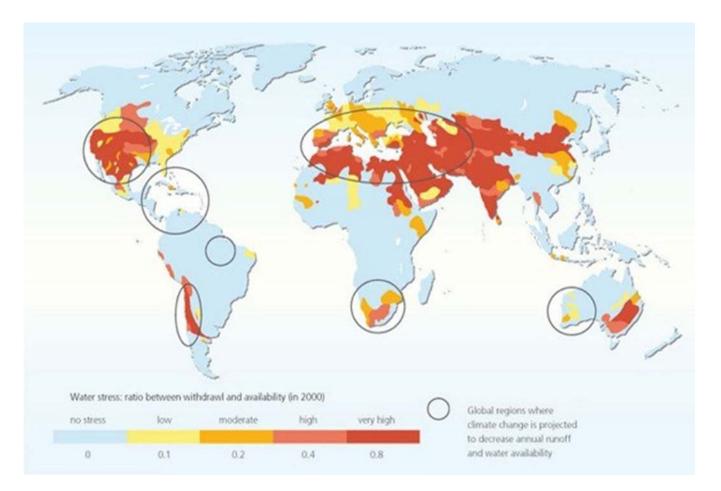

#### Soil degradation Pacific Ocean Pacific Ocean Atlantic Indian Ocean Ocean Very degraded soil Stable soil **Degraded soil** Without vegetation Source: UNEP, International Soil Reference and Information Centre (ISRIC), World Atlas of Desertification, 1997. Philippe Rekacewicz, UNEP/GRID-Arendal

#### Global soil degradation, and where Uruguay stands

#### Global water shortage and where Uruguay stands

#### Advantage # 2: Turnkey, Easy Investment

Most investors choose to:

- Outsource management of the operation to a farm management firm, which handles all aspects of the business (expertise is widespread and available); or
- Lease out the land (there is a very liquid rental market available).

#### Advantage # 3: Transparent Market for Land

- The country is mapped, with soil types classified according to their productivity
- Each type of soil is has a productivity index ("CONEAT" index)
- The map is available online
- Thus, land productivity is verifiable

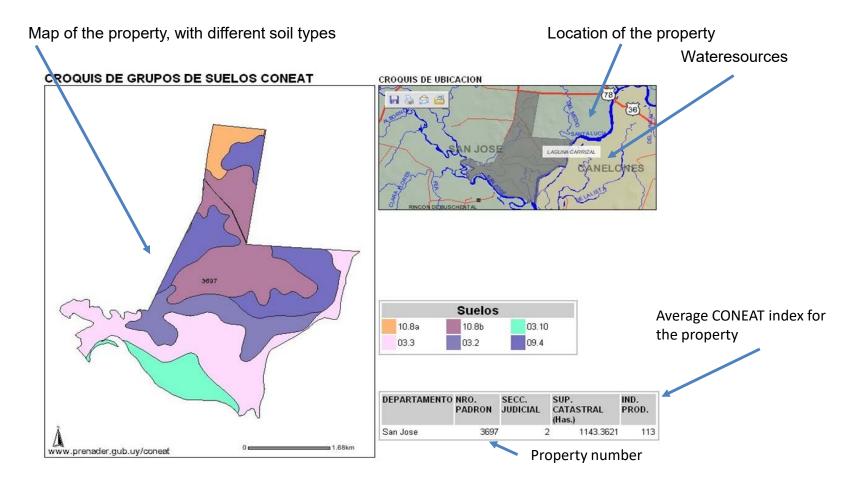

### The Online "CONEAT" System

- Type <a href="http://web.renare.gub.uy/sl/coneat/">http://web.renare.gub.uy/sl/coneat/</a>
- Plug in the property number(s)
- The system will show the specific property's:
- Iocation and water resources (rivers, creeks, lakes)
- detailed soil map, with soil types in different colors, and the percentage of each soil type description of each soil type
- the productivity index of each soil type ("CONEAT" index)
- ✓ the average "CONEAT" index for the whole property

## The Online CONEAT System: Example

# Advantages of the CONEAT System

- It allows anyone to verify the productivity potential of a property in Uruguay
- It provides a tool to determine uses for a specific farm
- The CONEAT index of a property correlates with the price of the land. The market is thus very transparent: it is easy to compare properties and determine their fair value

# Types of Land in Uruguay

- Agriculture (soybeans, wheat, rice, etc.)
- Cattle/sheep ranches, dairy farms
- Forestry: eucalyptus, pine
- Vineyards / olives / blueberries
- Oceanside rural land for development

#### Uruguay's Most Attractive Options

Agriculture: Soy, Wheat, Corn ▶ Global player, among leading exporters

Forestry:
Eucalyptus, Pine
▶ World's two largest
paper mills
▶ World's highest
FSC certification

Cattle: Angus, Hereford ► Top quality

- 100% Traceability
- 5% of world beef exports

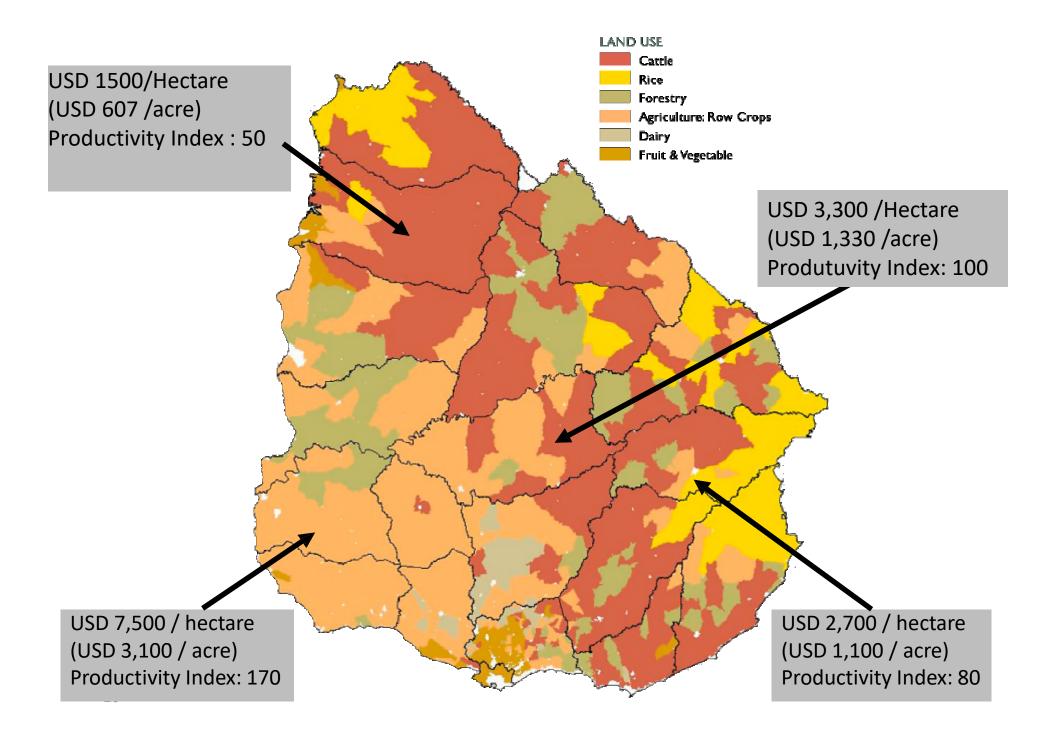

#### Farming has favorable tax treatment in Uruguay:

- Income tax:
- Flat 25% income tax rate, levied on net income
- For small farms, the rate is lower: farms with gross income
- below USD 250,000 per year have a capped tax amount of
- ▶ USD 5,125 (IMEBA system, which taxes sales –at 0 to 2%-
- instead of net income).
- Certain timber operations qualify for tax breaks
- Low property taxes: average is 0.2% \*
